## TNT estimates to implement recommendations on treatment of actinic keratoses

By Minna Johansson and Victor Montori.

Please note that estimates are rough and should be interpreted with caution.

## Table 5a

| Time needed to improve <br> the outcome for one <br> person | Time needed to provide the <br> intervention for all eligible in a <br> practice of 2000 people | Time needed as proportion <br> of time available |
| :--- | :--- | :--- |
| Not possible to estimate <br> since there is no evidence <br> that treating actinic <br> keratoses reduces <br> incidence of squamous <br> cell carcinoma | 60 h of GP time would be <br> needed to provide the <br> intervention to all eligible in a <br> GP practice of 2000 people. | $5.3 \%$ of total GP time <br> available with patients (for <br> all causes) would be needed <br> to implement the <br> recommendation. |

How TNT estimates were derived (more details available in Table 5b below):

Guidance from the region of Västra Götaland in Sweden available here (in Swedish): https://alfrescooffentlig.vgregion.se/alfresco/service/vgr/storage/node/content/28554/Ansvarsf\�\�rdelning\ mellan\% 20dermatovenereologi\%20och\%20allm\%C3\%A4nmedicin.pdf?a=false\&guest=true

Prevalence numbers available here: $\underline{\text { https://onlinelibrary.wiley.com/doi/full/10.1111/bjd. } 15107}$
Numbers on the Swedish population available here: https://www.scb.se/hitta-statistik/sverige-i-siffror/manniskorna-i-sverige/sveriges-befolkningspyramid/

30 minutes for $6 \%$ of the population.
$6 \%$ of 2000 people $=120$ people
30 minutes for 120 people $=3600$ minutes $=60$ hours
60 hours out of 1128 h available $=5.3 \%$

Table 5b

| Recommendation | Category of healthcare personnel | Time needed to provide the intervention to each person | Population eligible | Proportion of total population | Time needed per personnel category for all eligible |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Isolated AK may be treated with expectancy or kryo therapy. Multiple AK should be treated locally with kryo therapy or imikvimid, ingenolmebutat, diklofenak, fluorouracil. | GPs | Not specified. We assume 30 minutes per patient. | Prevalence of AK has been estimated to 19-24\% of individuals aged over 60 y and $3.6 \%$ of men aged $40-60 \mathrm{y}$. <br> In Sweden there are 2686000 people above 60 y , and 1 333000 men between 40-60 $y$. | 6\% | 30 minutes for $6 \%$ of the population |

|  |  |  | $\begin{aligned} & 21.5 \% \text { of } \\ & 2686000= \\ & 577490, \text { and } \\ & 3.6 \% \text { of } \\ & 1333000= \\ & 47988, \\ & \text { altogether }= \\ & 625478 \end{aligned}$ <br> Altogether, there are 10457147 people in Sweden. <br> 625 478/10 $457147=6 \%$ of total population |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
